Nidhi Kapoor. Editorial Note for the Journal of Phlebology and Lymphology. *J Phlebol Lymphol* 2020;13(1):10-11.

## ABOUT THE JOURNAL

Journal of Phlebology and Lymphology (1983-8905) is a peer reviewed open access journal. This scientific journal aims to provide the most complete and reliable source of information on the current developments in the field of Phlebology and Lymphology. The emphasis will be on publishing quality papers rapidly and making them available to researchers worldwide at no cost.

Journal of Phlebology and Lymphology is devoted entirely to function, mechanism, pathology of Lymphatic system and venous diseases. The journal keeps interventionalists, phlebologists, wound care specialists that treat acute, chronic and emergency wounds, and allied health professionals up-to-date by providing novel and authoritative information about experimental, clinical and basic science, medical research and clinical studies on a variety of Lymphatic system and diseases of the veins.

## HIGHLIGHTS OF 2019

Welcome to the J of Phlebology and Lymphology highlights of 2019, our annual selection of the best papers published in the previous year, which represent the breadth and excellence of the work published in the journal.

We would like to thank all of the journal's authors, reviewers, readers and Editorial Board, for their invaluable dedication and support over the last year.

We hope that you enjoy reading these papers and that you will consider publishing your next paper with J of Phlebology and Lymphology.

List of articles published in 2019 are

Great saphenous vein diameter at different regions and it's relation to reflux [1].

Cryo-laser and cryo-sclerotherapy guided by augmented reality for telangiectasias, feeder, and small varicose vein treatment - The CLaCS technique white paper report [2].

Augmented reality and duplex ultrasound in medical treatment decision: Score 9-1 [3].

Surgical Management of the Swollen Lower Extremity [4].

Incidence and distribution of lower extremity reflux [5].

## OBJECTIVES OF 2021

The J of Phlebology and Lymphology, is an open access magazine, with the objective to publish Phlebology and Lymphology related themes, as to better disclosure the knowledge about this matter.

According to the studies of diffusion we observe the views of the magazine on over 30 countries worldwide, with over 400 views in daily pages.

Due to the big financing form the J of Phlebology and Lymphology Editorial Board, soon we shall have more indexing and, in the future, an impact factor measure internationally. Our goal is the development of the best

scientific knowledge and its translation in the practical care, to the people in any cycle of life.

## USING SOCIAL MEDIA/DIGITAL MARKETING TO SHOWCASE ARTICLES PUBLISHED IN YOUR JOURNAL

### Pinned Tweet

If there is a specific journal article or link (for instance, call for submissions) you are looking to promote, you can tweet it out and then pin it so it always shows up as the first tweet anyone visiting your profile sees.

### Twitter Chat

Hosting a Twitter chat is an interesting way to build engagement on your account and improve your visibility.

## THANKS AND ACKNOWLEDGMENTS TO IMPORTANT REVIEWERS AND EDITORS FOR THEIR CONTRIBUTION

We are happy to say that we are on the right track. Our published papers represent the breadth of the life sciences. Our in-house editors and Editorial Board Members have worked hard to meet our goals of delivering timely decisions and maintaining communication with our authors throughout the editorial and review process. And where we have fallen short of our goals, we strive to do better.

But we wouldn't be anywhere today without our authors, reviewers, and readers. We have had the privilege to publish truly outstanding, high-quality papers that, judging by the response of our reviewers and readers, are important contributions to their respective fields of research. We want to take this moment to thank all of our authors for entrusting us with their discoveries.

We are grateful to reviewers who have contributed to the success of our journal and the quality of the final published papers you read in our pages.

Our reviewers, like our authors, come from all over the world—representing more than 40 countries—and all career stages. We believe that to truly have an inclusive journal, our reviewers and editors should reflect the broader biological community, and we keep this guiding principle in mind in everything that we do. Our editors consider all forms of diversity when inviting potential reviewers.
