

World Congress on Health and Medical Science

Alireza Heidari

ABSTRACT

The post report of World Congress on Health and Medical Science captures the programme of oral presentations, keynote presentations, panel discussions and shared dialogue at the webinar on leading the way in healthcare and emerging infectious diseases, which took place on June 17, 2020.

The event brought together doctors, physicians, professors, chief officials, entrepreneurs, researchers and also provided a treasurable networking opportunity and set the stage for more cooperation among doctors in Europe and beyond, including countries at different stages of development.

The online event began with opening remarks of the conference host and continued with a set of keynote presentations of real world cases describing new and remarkable initiatives keynote speakers

A series of stimulating speeches to create skills in and advance awareness of requirements health and medicine was of particular interest to industry and academia. The speakers addressed topics ranging from public health, pediatrics, dentistry, oncology, neurology, infectious diseases and internal medicine as well as taking a look into an ambiguous future through the senses of a futurologist.

Based on the theme the conference program addressed leading approaches and provided an opportunity to discuss and challenge some up-to-date practices.

Many participants have contributed in so many ways to turn this event into a smoothly running meeting with very interesting presentations and posters and a very good atmosphere for intensive networking.

We would like to thank all the attendees, media partners for all their great scientific input and for many fruitful discussions and scientific interaction.
